“You heard wrong” – users brutually reject Microsoft’s “Copilot for work” in Edge and Windows 11

By **Mayank Parmar** - November 28, 2025

'I'll believe it when I see it': Windows 11 users are cynical about Microsoft's promises to fix the OS and stop pushing AI

News By Darren Allan published February 2, 2026

BRAND OVERVIEW – NIKE

Live · 12,482 mentions

OVERALL SENTIMENT
72%
Positive · +4% vs last month

TOP ISSUE
Shipping Delays
1,204 mentions this week

FEATURE REQUEST
Size Guide
Requested 830 times

FEATURE SENTIMENT

Product Quality	88%
Mobile App	61%
Customer Support	38%
Returns Process	52%

RECURRING ISSUES

Slow response times from support chat	2.1k
App crashes on checkout flow	940
Inconsistent sizing across product lines	780

Mark Cannavan

System Architecture

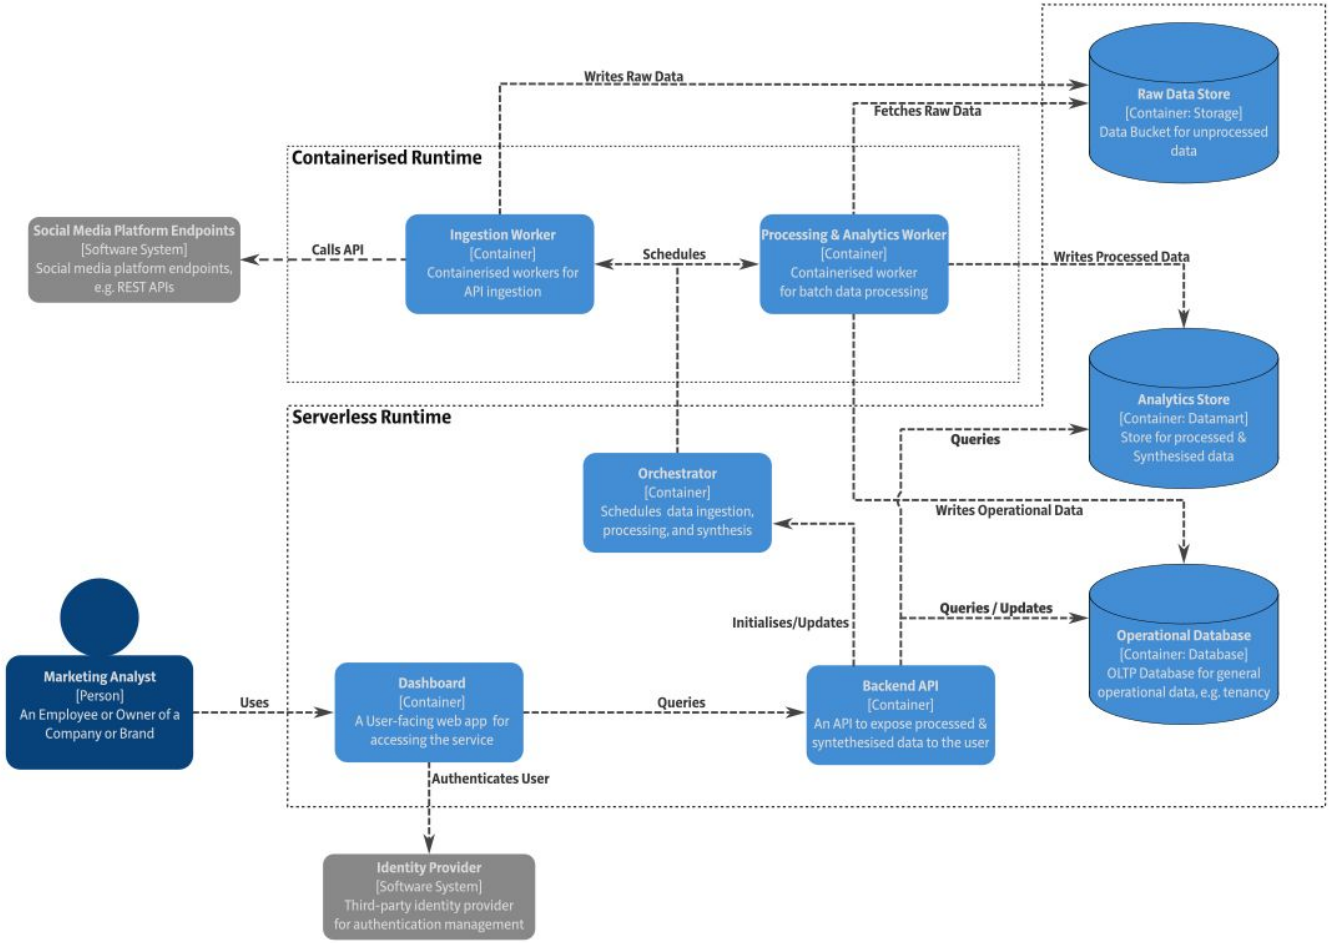
How everything fits together

Mark Cannavan

Hybrid Architecture Overview

Serverless Runtime
- Orchestration
- Stores
- Service

Containerised Runtime
- Ingestion
- Processing



Design Decisions

Constraint	Architectural Decision
Multi-tenant Access	Third-party Identity Provider
Burst-heavy Ingestion	Serverless Architecture / Scale-to-zero
Compute-intensive Processing	Containerised Workers
Hosting flexibility & Vendor lock-in	Cloud-agnostic design

Costs of Implementation

Design Choice	Trade-off Introduced	Why Acceptable
Serverless orchestration	Cold-start variability	Workloads are time-insensitive
Containerised processing	Increased operational complexity	Required for compute-heavy jobs
Managed identity provider	External dependency	Reduces security burden
Cloud-agnostic design	Fewer vendor optimisations	Increases strategic flexibility

Andrea Choe

Data Pipelines & Engineering

How we turn raw data into ready-made analytics.

Source | Ingestion | Storage | Processing

Source

Platforms: X, Reddit, Youtube, Tiktok

- Text-based and video-based sources
- General public and niche demographics

Platform-specific APIs

- Less data loss
- Adheres better to GDPR than web-scrapers

Ingestion

Processes include:

- Data cleaning
- Data validation
- Metric alignment
- Keyword extraction
- Feature extraction

Tools include:

- APIs
- Python scripts

Storage

Yearly storage: ~1.75GB

Hybrid storage model:

- PostgreSQL as DBMS
  - Scalable
  - Supports analytical queries
- OLTP for operational data
  - lightweight & fast
- Data mart for analytical data
  - Cost-effective
  - Star schema

Processing

ETL over ELT

- Transform API outputs before loading into DB
- Early data aggregation to align with GDPR

Batch processing

- Easier implementation
- Lower cost

Faruq Ayinla

Feasibility & Total Cost of Operations
